

## **INTERNET ACCESS SHEET**

There are no passwords required. In many instances, your computer or other Wi-Fi enabled device will automatically detect and connect to the wireless network. If your device does not connect right away, make sure that it's wireless utility is configured as follows:

- ▶ SSID or Network Name: **OceanLakes**

Information that may be needed for things such as gaming consoles, etc:

- ▶ WEP: **disabled**
- ▶ IP or Network Settings: **DHCP enabled** or **obtain an IP address automatically**
- ▶ DNS: **obtain DNS address automatically**
- ▶ Gateway: **no default gateway set** – your card should detect it automatically.
- ▶ Save your settings and restart computer if necessary.

**Need Some Help?**  
**(843) 492-6666**

*Please be in front of your computer with it powered up prior to calling.*
